

RoomsWithoutWalls

Small Group Collaboration Anywhere, Anytime

Deliver the quality and impact of "in-person" meetings to your remotely distributed teams and natural workgroups using RoomsWithoutWalls. Make business interaction easier to conduct, save on travel and conference call costs, and increase cross-organizational communications and productivity.

RoomsWithoutWalls, powered by the award winning web conferencing solution AT&T Connect, provides convenient, cost-effective forums to facilitate collaboration and knowledge exchange among small workgroups over the Web - scheduled in advance or set-up on the fly. They are ideal for conducting meetings with geographically dispersed business associates, delivering custom demos, or timely team collaboration.

RoomsWithoutWalls

Sound Familiar?

Your sales manager has a hot prospect on the line who wants to see a demonstration of your product ...NOW!

Your employees are dispersed and on-going communication is essential.

Your marketing team is working on the latest product collateral requiring updates on a daily basis and precious hours are eating away.

One of your affiliates needs your help and they need it now,

Your development team needs to review the final functional requirements with your business partner and they're 1200 miles away.

Sales, HR, and Customer Service, are facing similar challenges and the work needs to get done.

AT&T Connect

Intellor Group is an AT&T Connect authorized reseller. RoomsWithoutWalls is the only individual meeting room solution powered by the award winning web conferencing platform by AT&T. Intellor Group's RoomsWithoutWalls meeting room solution provides small and medium sized business access to the same high end web conference offered to large enterprises at highly competitive rates.

RoomsWithoutWalls

Experience The Power.

Cloud-based Service – Utilize advanced technology to automate daily management of your meeting rooms, track attendees, send invitations and more

Simple Entrance into Rooms – Custom entrance page includes a place for participants to provide their name and email identifying them as they enter the meeting.

Any-Device Voice Conferencing – Fully integrated, all IP conferencing allows the participant their choice of audio devices: Over-the-Web or 800 number dial-in.

Use Any Content - You can present, share applications, documents or media files, tour the web...use virtually any content type!

Video Conferencing – Fully integrated video conferencing allows your attendees to “See” during the presentation. Smart data stream management automatically disables video for those that do not have the bandwidth to view the video.

Integrated Chat – Send and receive notes throughout the meeting using an integrated notes and chat facility.

Remote Support – Use the integrated over-the-shoulder support to take control of a remote computer or application for help desk and support functions.

RoomsWithoutWalls

It's A Beautiful Thing.

Reduce Cost. Save time and travel cost by reducing remote in-person meetings. No need for unwanted travel time, expensive flights and hotels.

Increase Productivity. Spend more time getting the work done. Share documents, presentations, and review applications and web sites. Capture input and notes in one place and save it for updates and revisions.

Increase Communication. Foster communication and promote the exchange of ideas in a shared environment where everyone has the opportunity and the tools to participate and contribute.

Reduce Waste. Reduce or eliminate travel time, multiple meetings in remote locations, and note taking only to have to transcribe them at a later date,
